

SMS Attack & Phishing Risk Neutralization

As the digital footprint of an organization expands, so does the threat of SMS and phishing attacks, which are increasingly being leveraged by cybercriminals to target both individuals and organizations. Tackle smishing and phishing risk comprehensively before attacks even happen by reducing the human attack surface and addressing exposed data.

To combat these threats, Picnic offers a wide range of capabilities and services, focusing on proactive measures to defend against SMS and phishing attacks.

Select Capabilities & Services

- High-value and high-risk employee identification
- Open, deep, and dark web monitoring for exposed PII
- Red Team reconnaissance
- Customized Executive Exposure Reports
- Optional coverage for friends, family, and supply chain
