

Spearphishing Simulation & Mitigation

Spearphishing attacks are increasingly prevalent, with cybercriminals crafting highly targeted and personalized messages to deceive recipients into divulging sensitive information or executing malicious actions. Picnic helps combat spearphishing attacks by employing a multi-faceted approach that proactively addresses an organization's human attack surface to enhance its security posture.

Enhance spearphishing simulations by targeting HVTs and individuals most at risk, and by leveraging real-time risk assessments and remediation guidance from Picnic.

Select Capabilities & Services

- High-value and high-risk employee identification
- Ongoing monitoring of employees' digital footprints and flagging of exposed data
- Red Team reconnaissance
- Customized Executive Exposure Reports
- Smishing and phishing simulator
